SUMMARY

Computer Science student at Superior University (CGPA 3.69) with hands-on experience in full-stack web development (Next.js, React, PHP, MySQL) and machine learning (scikit-learn, Gradio). Built PayNexus, a live invoice and payroll platform, and a customer-churn model deployed on Hugging Face. Founded a self-funded academy and taught mathematics to 250+ students. Seeking an opportunity to contribute through shipped products, clear systems, and practical machine learning.

WORK EXPERIENCE

Founder and Lead Educator

Mathematics Education

Self-founded academy, Lahore

Designed mathematics curricula for 250+ learners online and in person, with a pass rate above 90%. Ran teaching, scheduling, and progress tracking independently.

PayNexus

Full-Stack Development

github.com/HafsaQamar2/Paynexus | paynexus-topaz.vercel.app

Invoice and payroll platform with branded invoices, PDF export, employees, payroll runs, salary slips, and JWT sign-in. A live demo creates a private sandbox company.

Telco Customer Churn Predictor

Machine Learning

github.com/HafsaQamar2/telco-customer-churn-predictor | hafsaqamar001-hhafsadsproject.hf.space

Gradio app that scores whether a telecom customer is likely to leave, using a saved Random Forest and its label encoders. Cross-validation reached 85%+ accuracy.

Superior E-Library

Web Development

github.com/HafsaQamar2/Elibrary-Management-System

PHP and MySQL library for Superior University with an admin catalogue, student portal, loans, configurable fines, and in-browser PDF reading.

NextStep AI

Frontend Development

github.com/gandeel47/NextStep_AI | github.com/HafsaQamar2/NextStep-AI

Career guidance for Pakistani students. Built the front end and interface. The application code is in the team repository, and the pitch deck is on my GitHub.
